PG DEPARTMENT OF APPLIED ZOOLOGY

FAUNAL DIVERSITY OF ALVA'S CAMPUS, VIDYAGIRI

2018-19

CHAIRMAN'S MESSAGE

Alva's Education Foundation is the crown of all the institutes under our umbrella. Personally, being an artist and sport lover, I cherish and realize our dreams of building a young generation with enthusiasm and cultural intelligence has found its realization through this foundation.

The diverse academic disciplines integrated with the cultural and sport activities is the driving force to make our youth competent enough to face any challenges of the global community. We through the individual centred pedagogy build abilities and skills to create new for the whole human community may it is knowledge wealth or social progression.

We ensure a safe and formative involvement for all the students to create themselves as the assets of the family and our great Nation.

Dr. Mohan Alva

Chairman,
Alva's Education Foundation (R.)

Principal's note

Diversity has been the key of evolution and evolutionary process. Human society which has a centralised power based system to define life has been always detrimental to existence of diverse living beings. The concept of mapping, recording and protecting diversity and hence, diverse process of evolution has gained importance when the process of life sustenance among human beings has been threatened. The unilinear model of progress accompanied by fourth generation industrial revolution is going to be very decisive in sustenance of life and diversity. Extreme atomization of internet of things and alien developmental models keeping nature at the tertiary point may lead to greater threats of life process.

I am very happy that the basic act of mapping and publishing the animal diversity in our campus has been successfully carried out by the Post Graduate Department of Applied Zoology. I congratulate the faculty members and students involved in this task and look forward for more inclusive and integrated efforts in future.

Coordinator's message

The Department of P.G. Studies in Applied Zoology was established in the year 2015-16 to equip the students with knowledge, necessary skills and orient them towards research in the field of Zoology. The department aims at not only providing quality education but also in nurturing the moral values among students so that we build a better society for tomorrow.

I am very pleased to present you the report of "Faunal Diversity of Alva's Campus, Vidyagiri" which is a fruit of tireless efforts of dedicated staff and students of the department. This first ever faunal diversity documentation report of Alva's Campus is one of the initiatives undertaken by the department to know our mother nature. You will be surely surprised to see the diversified fauna in the campus. I hope this report would serve as a base for the future documentation studies.

Thank you all for the support and looking forward for the same in future.....

ABOUT ALVA'S COLLEGE

Alva's First Grade College, established in the year 1998. Presently it offers 28 UG (Undergraduate) and 21 P.G. (Post Graduate) programmes. Alva's College is known for integration of cultural and sport activities with academics. Having been recognized as a premier institute under Mangalore University college has carved a niche for itself. Education at the degree level provides the students a solid platform for self-realization and moulds them into talents necessary for better tomorrow. Alva's college strives to fulfil the aspirations of such young spirits possibly by changing their vicissitude and making them into responsible individual capable of shouldering responsibilities both at the individual and social levels. Providing hundred percent placement opportunities for all eligible candidates. More than thirty certificate courses are offered to supplement professional development. Have been bagging highest number of ranks in Mangalore University examinations and retained the championship of sports and cultural activities since ten years.

ACKNOWLEDGEMENT

First and foremost, we the Post Graduate Department of Applied Zoology, would like to thank God Almighty for the strength, ability, opportunity to undertake this work and capability to proceed successfully.

We also express our deep sense of gratitude to Dr. M. Mohan Alva, Chairman, Alva's Education Foundation, Moodubidire, for providing this platform and great encouragement in various ways.

We are grateful to our Principal Dr. Kurian, for his timely support and immense encouragement in making this possible.

We also acknowledge Mr. Vivek Alva, the managing trustee of Alva's Education Foundation, for his immense support and encouragement towards developing a sense of responsibility among us towards wildlife and nature.

This documentation report results from the work developed under the guidance of Late. Harish Bhat, Research Scientist, EWRG, Bangalore. Commemorating his role in building scientific temperament among us, we express our special thanks to him who, although no longer with us continues to inspire us by his example and dedication.

Our deep sense of appreciation and gratitude to Mr. Sammilan Shetty, Butterfly Park, Belvai, for assisting us in identification of the butterfly species documented in the campus.

We also express a deep sense of gratitude to Dr. Krishna Mohan Prabhu, Moodbidri for his assistance in identifying the spider species documented.

Our heartfelt thanks to Dr. Basavarajappa S. Associate Professor, DOS in Zoology, Mysore University, for providing valuable suggestions in accomplishing this documentation.

We also acknowledge the contribution of the 2015-17 and 2016-18 alumni of our department in this documentation work.
